EXAMINER

NOAKES, SUZANNE MARIE

ART UNIT PAPER NUMBER

1653

DATE MAILED: 03/24/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/876,773

Applicant(s)

DARNELL ET AL.

Examiner

Suzanne M. Noakes, Ph.D.

Art Unit

1653

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 69-96 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☐ Claim(s) ____ is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☒ Claim(s) 1 and 69-96 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a receptor recognition factor, classified in class 530, subclass 350.
 - II. Claim 70 and 78, drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF) protein with four or more consecutive amino acids selected from (a)-(pp) from SEQ ID No: 2 or 4, classified in class 536, subclass 23.1. Note: Applicant is required to select ONE sequence from (a)-(pp). This is NOT an election of species.
 - III. Claim 71, drawn to drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF) protein with five or more consecutive amino acids selected from (a)-(x) from SEQ ID No: 2 or 4, classified in class 536, subclass 23.1. Note: Applicant is required to select ONE sequence from (a)-(x). This is NOT an election of species.
 - IV. Claim 72, drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF) protein with six or more consecutive amino acids selected from (a)-(o) from SEQ ID No: 2 or 4, classified in class 536, subclass 23.1. Note: Applicant is required to select ONE sequence from (a)-(o). This is NOT an election of species.
 - V. Claim 73, drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF) protein with seven or more consecutive amino

acids selected from (a)-(j) from SEQ ID No: 2 or 4, classified in class 536, subclass 23.1. Note: Applicant is required to select ONE sequence from (a)-(j). This is NOT an election of species.

- VI. Claim 74, drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF) protein with eight or more consecutive amino acids selected from (a)-(f) from SEQ ID No: 2 or 4, classified in class 536, subclass 23.1. Note: Applicant is required to select ONE sequence from (a)-(f). This is NOT an election of species.
- VII. Claim 75, drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF) protein with nine or more consecutive amino acids selected from (a)-(c) of SEQ ID No: 2 or 4, classified in class 536, subclass 23.1. Note: Applicant is required to select ONE sequence from (a)-(c). This is NOT an election of species.
- VIII. Claim 76, drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF) protein with ten or more consecutive amino acids selected from (a)-(b) of SEQ ID No: 2 or 4, classified in class 536, subclass 23.1. Note: Applicant is required to select ONE sequence from (a)-(b). This is NOT an election of species.
- IX. Claim 77, drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF) protein with eleven or more consecutive amino acids selected of SEQ ID No: 2 or 4, classified in class 536, subclass 23.1.

Note: Applicant is required to select ONE sequence from (a)-(pp). This is NOT an election of species.

- X. Claim 79, drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF) protein which said DNA molecule is capable of hybridizing to SEQ ID No: 1 under standard conditions, classified in class 536, subclass 23.1.
- XI. Claim 80, drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF), protein which said DNA molecule is capable of hybridizing to SEQ ID No: 3 under standard conditions, classified in class 536, subclass 23.1.
- XII. Claim 81-95, drawn to a recombinant DNA molecule encoding a receptor recognition factor (RRF) wherein the RRF contains one or more of the boxed regions of Figure 8B, classified in class 536, subclass 23.1. Note: Applicant is required to select ONE of the boxed regions. This is NOT an election of species.
- XIII. Claim 96, drawn to a method of purifying the recombinant RRF protein of Group XII, classified in class 530, subclass 412+.

The inventions are distinct, each from the other because of the following reasons:

1. Claim 69 links inventions II-XI. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claims, claim 69. Upon the allowance of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the

Art Unit: 1653

limitations of the allowable linking claim will be entitled to examination in the instant application. Applicants are advised that if any such claims depending from or including all the limitations of the allowable linking claims is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

2. Inventions II-XII are related as products which share an alleged common utility of a recombinant DNA molecule encoding an RRF but the common utility is NOT linked to a substantial structural feature. The products in this relationship are distinct if either or both of the following can be shown: (1) that the products encompass embodiments that are not required to perform the common utility or (2) that the products as claimed can be used to perform another utility. In this case, each DNA molecule encodes completely separate structures that may contain 4, 5, 6, amino acids of SEQ ID No: 2 or 4, or the entire structure of SEQ ID No: 2 or 4. There is no common structural feature among each of the separate fragments claimed that the examiner can see. If there is, Applicants are welcome to point out which of the fragments are functionally and structurally the same or equivalents and to state that each fragment is thus an obvious variant over all others. The products of each group can be utilized in completely separate assays or to be used in different hybridization experiments. Thus the search for one group is not coextensive with the search for the others, especially in the

Art Unit: 1653

electronic structure databases, not necessarily in the non-patent literature databases and as such an undue search burden would be placed on the examiner.

3. Inventions I and II-XII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the DNA of group II-XII is related to the protein of group I by virtue of the fact that the DNA codes for the protein. The DNA molecule has utility for the recombinant production of the protein in a host cell. Although the DNA and the protein are related, since the DNA encodes the specifically claimed protein, they are distinct inventions because the protein product can be made by other and materially distinct processes, such as purification from the natural source. Further, DNA can be used for processes other than the production of protein, such as nucleic acid hybridization assays.

4. Inventions I and XIII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the RRF protein can be used in a multitude of other processes such as in protein crystallization trials or *in vitro* binding assays.

5. Inventions II-XII and XIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant

Art Unit: 1653

case, the different inventions have different modes of operation because the DNA merely encodes for the protein to be purified, however, the DNA itself is not used in the method of purifying the protein. As such the two Groups would not be co-extensive in the requisite search which would place an undue search burden upon the examiner.

6. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1653

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suzanne M. Noakes, Ph.D. whose telephone number is 571-272-2924. The examiner can normally be reached on Monday to Friday, 7.30am to 4.00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jon Weber can be reached on 571-272-0925. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
